

OAT HULLS

DESCRIPTION:

Oat hulls are a high-fiber, low energy, low-protein feedstuff. Because of their high fiber content, oat hulls can be used as a roughage extender during times when forages are in short supply.

- Great bedding option
- Valuable roughage source for dry cow rations.
- Forage extender

TYPICAL ANALYSIS:

Dry Matter	90.0%
Crude Protein	3.5%
Fat	1.6%
Crude Fiber	30.0%
Neutral Detergent Fiber	70.2%
Acid Detergent Fiber	37.8%
Calcium	0.14%
Phosphorus	0.14%
Total Digestible Nutrients	31.5%
Net Energy - Lactation	30.2 Mcal/100 lbs.

NOTES:
